

New Job Alert

Ophthalmic Technician

Would you like to live and work in a sunny play land: surf in the morning, sip wine in the evening by the beach, or hike on weekends in our many nature trails? We may have just the right work/play environment for you. At XX Ophthalmic Consultants, we recruit the best and brightest technicians—and train them to lead! Our mission statement: “Superior patient care, superior work environment.” We teach a team approach at our region-leading optometric practice. We value every team member—and our benefits package reflects that commitment. We are searching for a can-do ophthalmic technician who likes to work hard/play hard. Three must haves: solid skills, hands-on optical experience, and knowledge of billing and coding. If you can bring us all that, along with a winning attitude and a good work ethic, let’s team up!

Position available immediately.
